

SECTION 1 IDENTIFICATION

1.1 Product Identifier

Product name: DXL-3 Fluorofab®

> DXL-5 DXL-6 DXL-10 DXL-12

Synonyms: **DXL PTFE Coated Woven Glass**

1.2 Relevant identified use of the product

Use of the Product: Industrial applications where high chemical and temperature resistance, excellent

release and good abrasion resistance is required.

1.3 Details of the supplier of the safety data sheet

Green Belting Industries Limited Company:

381 Ambassador Drive

Mississauga ON L5T 2J3 Canada

Telephone: +1 905 564 6712 (09:00 to 17:00 Eastern Standard Time)

Telefax: +1 905 564 6709

E-mail address: sds-support@greenbelting.com

European Union Biscor Limited

Contact: 8 Kingsmark Freeway

> Bradford West Yorkshire **BD12 7HW United Kingdom**

(09:00 to 17:00 UTC/GMT) Telephone: +44 (0)1274 694684

Telefax: +44 (0)1274 694685

1.4 Emergency Telephone Number

+1 905 564 6712 Available between the hours 09:00 to 17:00 (EST) North American

Emergency Telephone

Number:

Available between the hours 09:00 to 17:00 **European Union** +44 (0)1274 699425

Emergency Telephone

Number:

(UTC/GMT)

SECTION 2 HAZARD IDENTIFICATION

2.1 Classification of the Product

European Not a classified substance or mixture according to Regulation (EC) No. 1272/2008.

Communities (EC): Not classified as dangerous according to Directive 67/548/EEC.

USA: Not a hazardous material as defined by 29 CFR1910.1200, OSHA Hazard

Communication Standard.

Canada: Not a controlled product under WHMIS.

2.2. Label elements

Symbol: None
Signal Word: N/A
O N/A

Precautionary Statement: P261 – Avoid breathing any fume or dust that may be generated

P264 – Wash hands thoroughly after handling.

2.3. Other hazards

Use of this product is not normally considered hazardous, however material dust caused by cutting, sawing or sanding may cause eye or skin irritation. Processing at temperatures higher than 300°C can cause the evolution of particulate matter which can cause "polymer fume fever" which is a temporary condition that can cause flu-like symptoms and eye and respiratory irritation. The smoking of tobacco contaminated with PTFE can cause this condition. Processing at temperatures higher than 400°C will result in thermal decomposition of fluorinated thermoplastics and may release carbonyl fluoride which hydrolyses to hydrogen fluoride and carbon dioxide by reacting with moisture in the air. Thermal decomposition products may also include carbon monoxide and oxides of potassium. In all cases avoid exposure, move the individual to fresh air and consult a physician if severe.

SECTION 3 COMPOSITION/INFORMATION ON INGREDIENTS

Chemical Nature of the Mixture: DXL PTFE coated woven glass fabric

3.1 Substances

Not Applicable

3.2 Mixtures

Ingredient Name	CAS Number	% by Weight	Exposure Limits	Symbol	Risk Phrases
Polytetrafluoroethylene	9002-84-0	5 - 69	N/A	None	None
Glass Fibre (fiberglass cloth)	65997-17-3	31 - 95	OSHA PEL - 5 mg/m ³ ACGIH TLV - 5 mg/m ³	None	None
Proprietary Additive A	Proprietary	1 - 2	N/A	None	None
Proprietary Additive B	Proprietary	0.1 – 0.5	OSHA PEL - 5 mg/m ³ ACGIH TLV - 5 mg/m ³	None	None

The above product(s) are defined under the European Union's REACH (Registration, Evaluation, Authorization and Restriction of Chemicals) regulation as articles, and as such are exempt from the material safety data sheet provisions of 29 CFR 1910.1200(G).

None of the product components are intentionally released during their use when used as intended and in accordance with recommended specifications and parameters.

This product is REACH compliant and does not contain REACH SVHCs (Substances of Very High Concern) materials and is considered non-hazardous when used as intended and in accordance with recommended specifications and parameters.

For full text of the R-phrases mentioned in this Section, see Section 16.

For full text of the H-statements mentioned in this Section, see Section 16.

SECTION 4 FIRST AID MEASURES

4.1 Description of First Aid Measures

General Advice: Never give anything by mouth to an unconscious person. When symptoms persist or in

all cases of doubt seek medical advice.

Inhalation: N/A for material as supplied at room temperature and used as intended and in

accordance with recommended specifications and parameters. Processing at high temperature may generate fumes which can cause "polymer fume fever" leading to flu-

like symptoms. Remove to fresh air and consult a physician if severe.

Skin Contact: Not normally considered hazardous, however material dust caused by cutting, sawing or

sanding may cause skin irritation. Wash with plenty of soap and water. If irritation

persists get medical attention.

Eye Contact: Material dust caused by cutting, sawing or sanding may cause eye irritation. Wash with

plenty of soap and water. If irritation persists get medical attention.

Ingestion: If swallowed get medical advice. Do not induce vomiting unless instructed to do so by

medical personnel.

4.2 Most important symptoms and effects, both acute and delayed

Symptoms: Local irritation.

The thermal decomposition vapours of fluorinated polymers may cause polymer fume fever with flu-like symptoms in humans, especially when smoking contaminated tobacco. Symptoms may be delayed. Repeated episodes of polymer fume fever may result in persistent lung effects. Inhalation of decomposition products from overheating

may cause lung irritation or shortness of breath.

4.3 Indication of any immediate medical attention and special treatment needed

Treatment: Treat symptomatically.

SECTION 5 FIRE FIGHTING MEASURES

5.1 Extinguishing Media

Suitable extinguishing media: Water spray, Carbon dioxide (CO2), Foam, Dry Chemical

5.2 Special hazards arising from the product

Specific hazards during fire- Hazardous thermal decomposition products.

fighting: Hydrogen fluoride, fluorinated compounds, carbon oxides,

perfluoroisobutylene, tetrafluoroethylene, hexafluoropropylene and

trifluoromethane and oxides of potassium.

Exposure to decomposition products can be a hazard to health.

SECTION 5 FIRE FIGHTING MEASURES

5.3 Advice for firefighters

Special protective equipment Wear self-contained breathing apparatus and protective suit. Wear neoprene

for firefighters: gloves during cleaning up work after a fire.

Further information: Protect from hydrogen fluoride fumes which react with water to form

hydrofluoric acid.

Observe local regulations when contaminated water and burning waste are

removed.

SECTION 6 ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment, and emergency procedures

Personal precautions: For solid product none required.

For dusts and fibres generated during fabrication use protective equipment to

prevent the contamination of skin, eyes, and clothing.

6.2 Environmental Precautions

Environmental N/A - solid product

Precautions

6.3 Methods and materials for containment and cleaning up

For solid product collect with hands broom and shovel and place in non-hazardous waste collection container

for disposal.

For dusts and fibres generated during fabrication vacuum up and containerise.

6.4 Reference to other sections

For disposal instructions see section 13.

SECTION 7 HANDLING AND STORAGE

7.1 Precautions for safe handling

Advice on safe handling: Solid product which presents minimal hazards to personnel when handling in

accordance with operating and storage recommendations.

The primary health hazards associated with this product are the generation of dust during fabrication and the inhalation of thermal decomposition products when the

product is subjected to temperatures greater than 300°C.

Provide appropriate exhaust ventilation at places where dust or volatiles can be

generated.

Wash hands thoroughly before smoking as tobacco contaminated with PTFE can

cause "polymer fume fever".

Advice on protection against fire and

Dispose of in accordance with local regulations as a solid non-hazardous waste and

avoid inappropriate disposal practices.

explosion: Do not incinerate polytetrafluoroethylene (PTFE) waste.

Provide appropriate exhaust ventilation at places where dust or volatiles can be

generated.

7.2 Conditions for safe storage, including any incompatibilities

Requirements for storage areas and

No special precautions necessary, but recommend storing in a dry cool place and

areas and protecting from contamination.

containers:

Advice on common

No special restrictions on storage with other products. Keep away from tobacco

storage:

products.

Storage temperature:

No special restrictions.

Other data: Do not store in direct sunlight or in conditions of high humidity.

SECTION 8 EXPOSURE CO	NTROLS / PERSO	NAL PROTECTION			
8.1 Control Parameters					
In situations in confined spaces where the temperature of the polymer exceeds 500°F (260° C), thermal degradation products may be produced. Exposure limits for these products, which include perfluoroisobutylene, carbonyl fluoride and hydrogen fluoride, must not be exceeded.		perfluoroisobutylene carbonyl fluoride hydrogen fluoride	TLV TWA 10ppb 2ppm TWA 0.5ppm	TLV STEL - 5ppm 2ppm ceiling	IDLH (NIOSH) - - 30ppm
In situations where high levels of 5mg/m³ - 5mg/m³ 3 3 3 3 3 3 3 3 3 3 3 3 3 3 3 3 3 3 3				Other 3 x 10 ⁶ fibers/m ³ - 10 hour TWA (NIOSH)	
8.2 Exposure Controls			•		
Engineering measures: Eye protection:	If cutting, sawing or sanding of the product is necessary, to maintain exposures below recommended limits, a properly designed dust collection system is recommended at the operation source. Adequate ventilation must be provided when working with the product at elevated temperatures. Throughout basic product handling processes, and whenever handling materials containing fiberglass, safety glasses, goggles or face shields should be worn.				
Hand protection:	Throughout basic product handling processes, leather or synthetic fibre gloves are recommended to minimize cuts and abrasions.				
Skin and body protection:	The wearing of a loose fitting long sleeved shirt that covers to the base of the neck and long trousers is recommended to minimise exposure to fiberglass. Skin irritation from exposure to fiberglass is known to occur mostly at pressure points such as around the neck, wrist and waist.				

Hygiene measures: Handle in accordance with good industrial hygiene and safety practices.

Wash hands immediately after handling the product and do not contaminate

tobacco products.

Be careful not to rub or scratch areas irritated from fiberglass exposure, as fibres may be forced into the skin. Wash off any fiberglass in contact with the skin, and

consider the use of barrier creams which can minimise irritation.

Always use vacuum equipment to remove fibres and dust from clothing and never

use compressed air.

Contaminated clothes should always be washed separately.

Respiratory protection: Not required for normal use of the product.

In situations where high levels of airborne dust/glass fibres are present and which

exceed permissible exposure limits, or irritation occurs, then a correctly fitting

NIOSH/MHSA approved disposable dust respirator should be used.

In situations in confined spaces where the temperature of the polymer exceeds

500°F (260° C), an air supplied respirator should be used.

In situations where high levels of airborne dust/glassfibres or fume, use industrial

hygiene monitoring to ensure that TLV or PEL values are not exceeded. Excessive exposure to thermal degradation products could result in delayed pulmonary edema and in some cases, and on very high exposure damage to the liver and kidneys. These substances may include perfluoroisobutylene (TLV = 10ppb), carbonyl fluoride (TLV = 2ppm TWA, 5ppm STEL), hydrogen fluoride (TLV =

2ppm ceiling, 0.5ppm TWA).

SECTION 10 STABILITY AND REACTIVITY

10.1 Reactivity: Stable at normal ambient temperature and pressure

10.2 Chemical stability: Product is chemically stable

10.3 Possible hazardous reactions: Stable under recommended storage conditions

10.4 Conditions to avoid: Avoid heating for prolonged periods above the recommended

upper usage limit

10.5 Incompatible materials: Alkali metals, Strong oxidizing agents, Halogenated compounds

10.6 Hazardous decomposition products: May include:

Fluorinated hydrocarbons, Carbonyl fluoride, Hydrogen fluoride,

carbon oxides, perfluoroisobutylene, tetrafluoroethylene,

hexafluoropropylene, trifluoromethane.

SECTION 11 TOXICOLOGICAL INFORMATION	SECTION	11 TOXICOL	OGICAL INI	FORMATION
--------------------------------------	---------	------------	------------	-----------

11.1 Information on toxicological effects

Acute oral toxicity Polytetrafluoroethylene Proprietary Additives

LD50 / rat : > 11,280 mg/kg no data available

Skin irritation May cause skin irritation in susceptible persons.

Polytetrafluoroethylene Polytetrafluoroethylene

Human Rabbit

Classification: Not classified as Classification: Not classified as irritant

irritant

Result: No skin irritation

Result: No skin irritation

Proprietary Additives no data available Proprietary Additives

Eye irritation Polytetrafluoroethylene Proprietary Additives

Mild eye irritation no data available

Sensitisation Polytetrafluoroethylene

Human

Classification: Not a skin sensitizer. Result: Does not cause skin sensitization.

Patch test on human volunteers did not demonstrate sensitization properties

Proprietary Additives no data available

Repeated dose toxicity Polytetrafluoroethylene Oral - feed rat - no toxicologically significant effects

were found.

Proprietary Additives - no data available

Mutagenicity assessment Polytetrafluoroethylene

Tests on bacterial or mammalian cell cultures did not show mutagenic effects.

Proprietary Additives - no data available

Polytetrafluoroethylene **Proprietary Additives** Carcinogenicity assessment

carcinogen

Toxicity to reproduction

assessment

Polytetrafluoroethylene and Proprietary Additives

No data available

No data available STOT-Single exposure

STOT-Repeated exposure No data available

Aspiration hazard Not applicable

SECTION 12 ECOLOGICAL INFORMATION

12.1 Toxicity Toxicity to fish (Polytetrafluoroethylene) - the substance is a

polymer and is not expected to produce toxic effects.

Proprietary Additives - no data available

12.2 Persistence and degradability no data available 12.3 Bio-accumulative potential no data available 12.4 Mobility in soil no data available

12.5. Results of PBT and vPvB assessment

no data available

12.6. Other adverse effects

Additional ecological information no data is available on the product itself.

SECTION 13 DISPOSAL CONSIDERATIONS

13.1 Waste treatment methods

Where possible recycling is preferred to disposal or incineration. Dispose of in accordance Product

with local regulations. Incinerate only if incinerator is capable of scrubbing out hydrogen

fluoride and other acidic combustion products.

SECTION 14 TRANSPORT INFORMATION					
	14.1	14.2	14.3	14.4	14.5
