

Low cost; few layers of tape

Minimize downtime; increased wear resistance

Reduced cycle times; higher temperature range

Less adhesive cleanup; no residue post-process

PVC WINDOWS

Welding / Sealing of PVC to produce windows and sky lights

Our line of **100 Series, DXL Series, and GR6 Tape** adhesive products help PVC window manufacturers weld windows and skylights by minimizing downtime and the amount of tape used unlike standard coated materials. For more information about Green Belting Industries PTFE products, please contact your Green Belting Industries representative or call our customer service department.
