

The OEM & Green Belting Advantage

Quality

Green Belting has been a trusted OEM partner for over 20 years. Our swabs are manufactured to OEM specifications and reduce false positives and lower background noise. We use the highest grade of materials that increase harvesting effectiveness.

Pricing

Green Belting offers competitive market pricing across all OEM product lines with no compromise to quality. We consistently work with OEMs to reduce product costs and end user pricing. No order is too big or too small.

Production

Our products are built right the first time. OEM support offers exact fit, form and function. Our production facilities have dedicated clean rooms. All consumables are developed to exact OEM specifications to reduce downtime and will not void OEM warranties.

Support

High level of engineering engagement between Green Belting and all OEMs. Upgrades, enhancements and modifications are all approved and tested. At Green Belting we have a dedicated product line as well as sales and customer service support.

Return on Investment

Our OEMs offer best in-class performance at competitive market pricing. This allows higher quality products returning to the end-user. End-users can rely on years of R&D and testing all packed into one product line.

Research & Future Development

Continued engineering development to ensure continued success alongside OEM design advancements. Our OEMs assure continued investment in their products and all consumables.
